# Exporting Inventory Information from eBay

1. Log in to eBay: [My Ebay](#)  
-> [File Exchange](#) ->  
[Create a Download Request](#)
2. Select:
  - **Listing and Records:**  
Active
  - **Download Format:**  
Standard
  - **Date Range:**  
All Active Listings
3. Save and wait for the file to be email from eBay
4. Open the file in excel (preferred).

Activity Messages(5) Account Applications **NEW**

### Create a Download Request

Select active listings and sales history records that you want to download.  
**Note:** Your sales records are available for the current month and the past three calendar months.

**Listings and records**

# Creating a Mass Import File for Gamut

1. Create a Mass Import file by creating a template.txt file in **Gamut** under **Inventory Tab**
2. Open the .txt file in Microsoft Excel
  - You will need to fill out the excel file with your inventory information:
    - Item ID
    - Weight
    - Quantity
    - Distributor Product ID
    - Location
    - Item Name
    - Item Cost

Website Manager || Inventory || Order Manager || Financial Snapshot || Create Order ||

Import Inventory

Invoice Type: Excel Distributor: WMS **Create Template**

Invoice Location:  Browse Import

Import Preview

	A	B	C	D	E	F	G
1	Item ID	Location	Weight	Item Name	Quantity	Item Cost	Distributor Product ID (Optional)
2							
3							
4							
5							
6							
7							

- With both excel documents open (**eBay's export and Gamut's import files**) you may copy some information from the eBay export document that will be useful for importing to Gamut.
- Gamut Import Inventory Fields and what they match to in the eBay import:
  - Item ID matches to Custom Label. (IMPORTANT)
  - Location is used for designating where an item can be located for shipping purposes.
  - Weight is used to calculate shipping costs. This is the weight of the item by itself.
  - Packed Weight is also used for calculating shipping costs. This is the weight of the item when packaged. (Optional)
  - Item Name can be matched to Item Title.
  - Quantity can be matched to Quantity.
  - Item Cost is the wholesale cost of the item
  - Distributor Product ID can be left blank unless you know the distributor ID that you wish to assign these items to. (Optional)

# Mass Import to Inventory

- **Fill in the rest of your inventory information for each item**
  - For new inventory items, all columns will need to be completed to import, with the exception of Distributor Product ID
  - If you do not have a designated item location, do not know your item weights, or wholesale costs you can enter an arbitrary location or price. However, we highly suggest only importing your complete inventory information to be able to use Gamut to its full potential
