Inventory Manager: Overview

Inventory Management

- Manage distributors, stock counts, pricing, SKUs, and more via an easy to use interface.
- Connect inventory with sales transactions allowing for easier management of stock quantities.
- Predictive ordering assistant which uses recent sales history trends to help user decide how much they need to restock of any given item based on their purchasing frequency.
- Generation of reports that show where your items are listed, which listings may need to be taken down or adjusted based on quantity in stock, and which items aren't listed at all.
- Sync EBay Listing quantities with current inventory.

- Keeps track of any out of stock (oos) / **backordered** orders
- When re-stock items are added back to the inventory, the orders for restocked items are **removed** from the list
- You can manually remove canceled orders from the list using the **remove** button
- Order will also be removed from the list if you uncheck the “inhouse button” in the Order Manager for the specified order. This will remove the “**backordered**” status for that order.

Mass Import to Inventory

- Create a Mass Import by creating a template.txt file which can be opened in Microsoft Excel
- Fill out the excel invoice with your new/restock order
- Import the Invoice

Mass Import to Inventory

- Imported file is checked against current inventory
- Add any unallocated costs such as **shipping** or **import fees** to each item cost distributed based on either percentage (item unit cost / total order cost) or quantity (unit / total units)
- Add, Delete, and Edit items
- Complete Import to add all of the items to your inventory
