# Order Manager: General Overview

## Order Management (Base Subscription / Free Trial Version)

- Seamless integration with existing eBay accounts, eBay sales since the last refresh are imported with the click of a button.
- Manage sales transactions from initial sale to shipment.
- Filter orders by status for quickly targeting groups of orders (e.g. orders shipped but missing tracking in eBay).
- Pulls in tracking numbers provided by eBay and PayPal shipping as well as allows user to manually add tracking and push to eBay when needed.
- When used with Inventory add-on allows for syncing inventory price / qty with the eBay transaction via a single click (e.g. adjust stock count and assign wholesale cost of item to the transaction for profit and weight calculations).
- Notification when transaction results in negative profit.
- When used with Inventory add-on, notification when stock counts are approaching zero, are zero, or item has been discontinued.
- Ability to manually create orders for non EBay sales.

# Order Information Included on Order List

The columns which are shown, the order shown, and the width of columns is completely customizable

The screenshot shows a table with columns: id, Whole..., S/H Cost, Weight, Location, Inhouse, Back... and a 'Table Options' button circled in orange. Below the table is a list of columns with checkboxes, including Order Status, Order Date, Ship Date, Account Name, Ebay Site, Ref. Number, Item ID, Item Name, Customer ID, Email, Name, Country, Address, City, State, Zipcode, Retail \$, S/H Paid, Wholesale \$, S/H Cost, Weight, Location, Inhouse, and Backordered. At the bottom of the menu are options for Horizontal Scroll, Pack All Columns, and Pack Selected Column.

- **Table Options Button:** Allows the user to pick which columns are shown in the Order Manager Screen
- **Horizontal Scroll Option:** Allows the user to add or remove a horizontal scroll bar when the Order Manager is minimized or viewed on a small screen
- **Pack All Columns:** Auto resizes all columns based on the contents
- **Pack Selected Column:** Auto resizes the last column selected

**NOTE:** Columns which are only available with Inventory Manager Add-on include:

- **Inhouse checkbox:** works with the inventory system to track inventory
- **Backordered checkbox:** for out of stock items in the inventory system

This close-up shows the 'Table Options' button circled in orange, with arrows pointing to the 'Inhouse' and 'Backordered' checkboxes in the table below it.

- To edit orders, (1)double click the cell you want to edit. After you have made your edits, (2)the changed cell appears green.
- (3)Apply Changes after you have completed your edits. You must click the apply button to continue processing orders. To clear any changes, click the **Clear All** button.
- Note: Customer ID is unique for each customer and can not be edited.

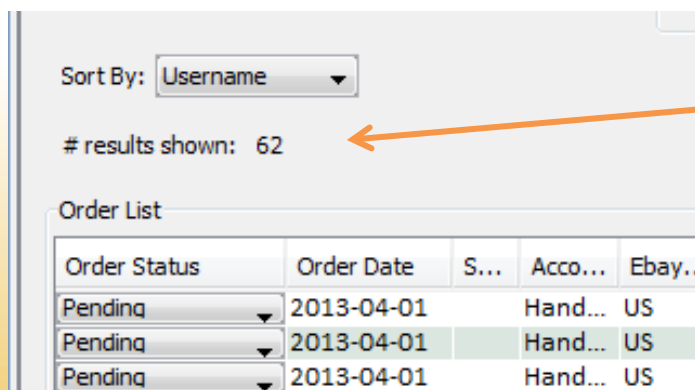

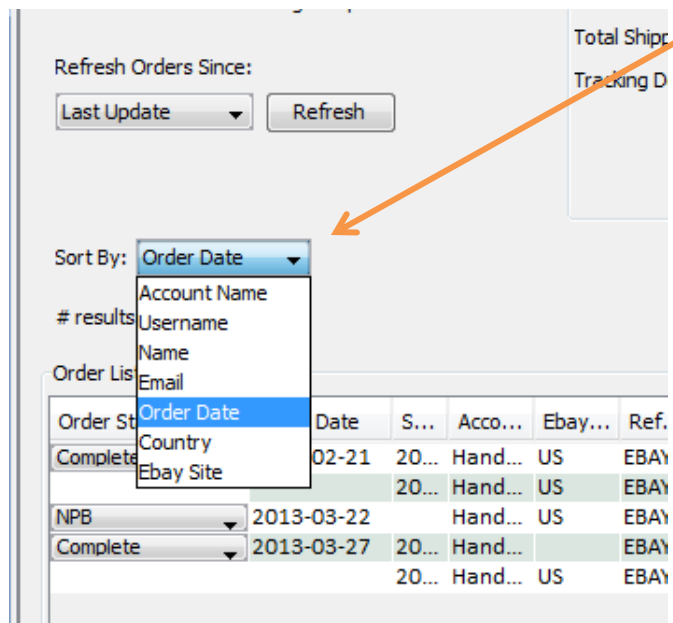

# Sorting Orders

Sort orders based on:

- Account Name
- Customer ID
- Name
- Email
- Order Date
- Country
- eBay Site

# results shown on order list.

- For example, search by item ID to see how many of that item has sold within a set time period.
- Only the first 100, 200, or 500 orders at a time will be shown depending upon user settings.

Complete	2013-03-24	20...	Hand...	US

- **Order statuses** are for the most part completely user driven and are for managing new orders from purchase to order shipment.
- Gamut focuses on giving the user **complete control over their orders**.
- Once an order has been imported and changed (status other than “New”):
  - Changes from 3<sup>rd</sup> party sites (such as eBay or Amazon) will be **ignored**
  - **Prevents data loss by a 3<sup>rd</sup> party site overwriting changes made by user**
  - 3<sup>rd</sup> party sites may not be privy to changes made by user, e.g. customer changes address or item ID via email/messages

(Please see the Search and Filter Tutorial for more information)

# Filtering and Searching Orders

## Filter orders based on **Order Status**

- **New** - Orders which have been placed but where customer has not completed checkout or paid.
- **Pending** – Orders which have been placed and customer has completed checkout.
- **OOS** (out of stock)- Orders which have an item that is out of stock.
- **NPB** (non-paying bidder) – eBay orders which have not been paid for and been filed as NPB.
- **Pending Print** – Orders which have been paid and can be moved on to further processing by printing the label for shipping.
- **Pending E-check** – Orders which were paid via E-check and are pending for the payment to clear.
- **Pending Money Order** – Orders which are pending a Money order payment.
- **Export Labels** – Orders which have been processed, shipping labels have been printed, and are waiting to be shipped.
- **Admin Hold** – Orders which have been placed on hold for any order issues or are pending customer response such as incorrect address or requested order changes.
- **Pending Tracking** – Orders which do not have a tracking number pulled in from eBay or entered manually.
- **Unmerged Multi-Orders** – Orders that are in new, pending, or pending print status where the same customer has purchased several products from different auctions. These orders can be merged to save on shipping.

# Importing New Orders from eBay or Websites

- **Refresh button** – pulls in new orders from eBay
- Drop down menu allows you to choose to pull in orders from last update or 1-2 days prior.
- **Last Update** – Date when new orders were last pulled from eBay
- **Current Status** – While refreshing, the status update will change to “Updating” until complete

(Please see the Importing New Orders tutorial for more information)

# Additional Order Information

- When a **completed** order or an order with a **printed label** is selected, the shipping method and tracking details are pulled from eBay.
- If the shipping label was not printed through eBay or PayPal, the tracking can be entered **manually**.
- The “**Push Tracking to eBay**” button will push any manually entered tracking information to eBay.
- For customer orders which have been **paid separately but shipped together** (i.e. multiple checkouts by same customer) you can push the same tracking number out to all related orders provided they are merged within Gamut.

Update All Like Items (All Inhouse or All Non-Inhouse)

# Merge, Un-Merge, Split and Delete

- **Merge / Un-Merge:** Combine or uncombined items in multiple item orders. Great for eBay purchases with multiple checkouts by the same customer.
- **Split:** Selling multiple items in one auction? Split the order to add items for better management of inventory.
- **Delete:** Delete unwanted item lines. Please note deletion is **permanent** and can not be undone. You can re-enter the information manually. See **Create Orders Manually** tutorial for more information.

(Please see the Merge, Un-Merge, Split tutorial for more information)

The screenshot displays an eBay order management interface. At the top left, it shows 'Last Update: 01 Apr 2013 18:10:44' and 'Current Status: Successfully applied chan...'. Below this is a 'Refresh Orders Since:' section with a 'Last Update' dropdown and a 'Refresh' button. To the right is an 'Additional Information' panel with fields for 'Shipping Method: USPSFirstClass', 'Inhouse Shipping Weight: 0.0', 'Total Shipping Weight: 0.0', and 'Tracking Details:'. A 'Push Tracking to eBay/Website' button and a checked checkbox for 'Update All Like Items (All Inhouse or All Non-Inhouse)' are also present. On the right side, there is a 'Filter Search' panel with a search box containing 'john geisler', a 'Search' button, and various filter options like 'New', 'Complete', 'Pending Print', etc. Below the filters is a 'Date Range' section with 'From:' and 'To:' input fields, and a '# Results: 100' dropdown. At the bottom right of the filter panel is an 'Apply Changes' button. In the center of the interface, a row of action buttons is circled in orange: 'Un-Merge', 'Merge', 'Split', and 'Delete'. Below this is an 'Order List' table with columns for Order Status, Order Date, S..., Acco..., Ebay..., Ref. ..., Item ID, Item Name, Customer ID, Email, Name, Country, Address, City, St..., Zipc..., Retail \$, S/H ..., Whole..., S/H ..., Weight, Location, Inhouse, and Backordered. The table contains several rows of order data, with the last two rows highlighted in blue.

# Order Cost Breakdowns

## Offers Customizable Final Profit Estimates Based on Sale Site

Additional Details for: ebay\_user\_6255

Items in order: 1

Cost Breakdown (Estimates Only)

Wholesale Cost:	\$69.00	Total:	\$110.00
S/H Cost:	\$8.00	Subtotal:	\$30.61
PayPal Fees:	\$2.39		

Custom Fee/...	Fee Amount	Profit
EBay Standard	\$9.90	\$20.71
EBay TRS 20%	\$7.92	\$22.69

- Estimates are for assisting in giving a **snapshot of profit** break down for each sale, they are **not** added into any of the financial information in the Financial Snapshot tab.

- Most ecommerce sites provide sellers with an invoice each **Month** with the exact amount due, it is suggested that that amount is added directly as an expense each month to insure accurate reporting of expenses.
- The cost breakdown is a great tool for quickly identifying whether a listing is generating **profit or losing money**.

Manage Custom Fees

Additional Fee List

- EBay Standard
- EBay TRS 20%

Add 3rd Party Site/Fee

Site/Fee Name:

Fee Percentage:  %

Flat Fee:  (e.g. 0.05)

Delete Clear Add/Update

**Customizable Fees:** Enter a name for your fee and either a % or flat fee. For example:

- eBay fees (20%) – Top Rated Seller Discount
- Your Own Website – No final value fees

# Export Orders

**Export Labels** Button outputs all orders which are under the “Export Labels” Status into a tab delimited “ExportedLabels.txt” file, which can be opened and viewed in excel. Additionally, invoices for each order can also be created.

## Export Labels Status
